Instructions

**Line 1.** Enter tax valuation of all Class I real property (residential and agricultural property) included on the tax list most recently certified for collection. Enter the <u>existing effective</u> tax rate <u>in mills</u> for Class I. Multiply the tax value times the rate and divide by 1,000 to get tax revenue in dollars.

**Line 2.** Enter tax valuation of all class II real property (all other real property) included on the tax list most recently certified for collection. Enter the <u>existing effective</u> tax rate <u>in mills</u> for Class II. Multiply the tax value times the rate and divide by 1,000 to get tax revenue in dollars.

Line 3. Enter the estimated valuation of public utility personal property for the first tax year the levy will be assessed against public utility personal property. To determine the public utility valuation, please refer to the values in the appropriate spreadsheet available at:

www.tax.ohio.gov/channels/government/services\_for\_local\_govts.stm

**Note:** Public utility personal property taxes are assessed at the same time as real property taxes, except, beginning in 2007, telecommunications property. The public utility values in the spreadsheets reflect the shift of telecommunications property to general business property.

Enter the gross tax rate requested in mills. Multiply the tax value times the rate and divide by 1,000 to get tax revenue in dollars.

Line 4. Using the estimated values published on the Department of Taxation's Web site at the address provided above, enter the estimated general personal property value for the first general personal property tax year the levy will be collected. (Note: If the first year for which the levy will be assessed against real property is tax year 2008, then the first tax year that levy will be assessed against personal property will be 2009.) Since telecommunications companies are the only general businesses that are still liable for the personal property tax, and then only for tax years 2009 and 2010, only the estimated value of the telecommunications property should be entered on this line. No entries should be made on this line for levies that will first be effective for real property for tax year 2010 or thereafter. Then enter the gross tax rate requested in mills. Multiply the tax value times the rate and divide by 1,000 to get tax revenue in dollars.

Line 5. Enter the amount of the reimbursement payment (if any) the subdivision will receive for a qualified renewal levy for the first general personal property tax year the proposed levy will be or would be in effect. (Note: If the first year the proposed levy will be assessed against real property is tax year 2008, then the first year that levy will be assessed against personal property will be 2009.)
